👤 PROFILE

Results-driven Software Engineer with 3+ years of experience building scalable web and mobile applications using Angular, React, and Ionic. Expert in geospatial integrations and modern frameworks, delivering innovative solutions for government and private sector enterprises.

🛠 TECHNICAL SKILLS

Angular		Ionic Framework	
Python		Vue.js	
React.js		Typescript	
HTML		Bootstrap	
Angular Material UI		Javascript	
CSS		Node.js	
SQL			

📁 PROFESSIONAL EXPERIENCE

- Software Engineer, Tadvit Info Technologies** 02/2024 – present | Ahmedabad, India
- Developed and maintained a large-scale **cross-platform mobile application for Chhattisgarh State Power Distribution Company Limited (CSPDCL)** using **Ionic, Angular and TypeScript**, enabling field teams to digitally map and manage the existing electrical distribution network. Built interactive GIS-based drawing and asset-mapping tools using **Leaflet**, significantly streamlining field survey and network-mapping operations.
 - Engineered **dynamic JSON-driven forms**, reusable Ionic components, device-based authorization, offline data handling and complex **REST/third-party API integrations**. Worked extensively with device capabilities, geolocation, interactive maps and field-data workflows to deliver a reliable mobile experience for **5,000+ daily users** in a live production environment.

- Designed and developed the mobile application for **Track-Fields**, a GIS-enabled field operations and project-monitoring platform supporting **GPS-based field inspections, geo-tagged data capture, offline data collection and synchronization, configurable forms, asset mapping and interactive GIS visualization**. Built scalable mobile workflows for enterprise and government field operations with a focus on usability and real-world field conditions.
- Developed **KishanGuru**, a mobile-first digital agriculture platform featuring **GPS and map-based farm registration, interactive farm boundary mapping, crop lifecycle and activity management, weather/satellite-driven information, notifications, expense tracking and marketplace workflows**, delivering an integrated digital experience for farmers.
- Implemented and integrated **RESTful APIs** across mobile applications for authentication, data synchronization, media handling and backend communication, while developing reusable components and optimized workflows to improve application performance, maintainability and user experience.
- Worked with **Capacitor/native device capabilities, SQLite/local storage, geolocation, camera/media functionality, push notifications and Android platform integrations**, supporting the complete mobile application lifecycle from development and debugging to production deployment.
- Contributed to a **React-based solar production and mapping platform** using Google Maps JavaScript APIs, with exposure to **Node.js REST APIs and PostgreSQL**, demonstrating full-stack integration capabilities alongside primary expertise in Ionic/Angular mobile development.

Core Technologies: Ionic Framework, Angular, TypeScript, JavaScript, Capacitor, RxJS, HTML5, CSS/SCSS, REST APIs, SQLite, Leaflet, GIS/Mapping, Google Maps APIs, Android Studio, Git, Node.js, PostgreSQL

Frontend Developer, AIMDek Technologies Pvt Ltd 09/2022 – 01/2024 | Ahmedabad, India

- As a **Frontend Developer** at AIMDek Technologies, I played a key role in the successful execution of projects by actively engaging with various technologies, including **Angular 8, React 10, NGRX, Angular Material UI, React Material UI, Redux Observable, Angular Reactive Forms, Typescript** and **Javascript**.
- My responsibilities extended to working with **Angular directives** and leveraging **Angular dependency injection** for efficient and scalable code.
- I actively participated in project meetings such as **SCRUM** (Daily Standup), Retrospective, and **Sprint (Release)** End Demo.
- I carefully monitored the progress of **my tasks, stories, and bug resolutions** through Agile tools.
- Additionally, I collaborated seamlessly with a large team, contributing to the development of numerous stories, new features, and screens.
- I took a proactive approach to project management, leveraging advanced version control systems. **Proficient** in Git, I utilized GitHub and Sourcetree Desktop for efficient branch operations, seamlessly pulling and pushing code changes. Additionally, GitLab served as a robust platform for overseeing project repositories, ensuring streamlined collaboration and code integration.

Project Intern

01/2022 – 08/2022 | Vadodara, India

L & T Technology Services (Knowledge City)

- In my job, I worked with a mix of technologies like InfluxDB, **Python's pandas** library, and **FastAPI** to make it easy for different software parts to work together. My expertise also extends to leveraging **PyQt5** as the **GUI** library for efficient interface development.
- Additionally, my worked into the realm of **Cyber Security**, where I engaged in Lua **PCAP Dissection** and **Regex** to fortify systems and data integrity.

PROJECT

BlogMatters : Simple Blogging Site

09/2022 – present

- Built a **React**-based blogging site (<https://reactblog-6f1c2.web.app> ) with user authentication and CRUD functionality.
- Deployed on **Firebase**, handling **100+** mock users; Git repo: <https://github.com/Rd123456789/blogging-site2> .
- Planned REST **API integration for v2**, enhancing scalability.

EDUCATION

Maharaja Sayajirao University of Baroda

09/2020 – 06/2022 | Vadodara, India

Master Of Computer Application

C.U. Shah University

07/2017 – 05/2020 | Wadhwan, India

Bachelor of Science Information Technology (Bsc I.T.)

LANGUAGES

English • Hindi • Gujarati
